Experience

Bili Plugins, WordPress Developer

Mar 2022 - May 2024

- Developed and maintained custom WordPress plugins from scratch
- Integrated third-party APIs to extend WordPress functionality.
- Maintained high standards of performance, security, and scalability.
- Regularly updated and improved plugins based on feedback and WordPress updates.

Projects

Timed Visibility Block

wordpress.org/plugins/timed-visibility-block

- A powerful Gutenberg wrapper block that allows scheduling when content is shown or hidden based on various time-based rules.
- Features: Date-time range visibility, daily scheduling, and optional fallback messages for hidden content.

Bento Box

wordpress.org/plugins/bento-box

- Developed a Gutenberg block plugin enabling customizable Bento/grid layouts for WordPress.
- Features: responsive design, a random layout generator, and interactive hover effects.

Super Powered ACF

github.com/Hackkzy/super-powered-acf

- AI-powered plugin for generating custom ACF fields automatically.
- Utilized PHP, JavaScript, and the Gemini API for intelligent and efficient field generation.

Education

Diploma in Computer Science

Aug 2018 - Jun 2021

- CGPA: 8.75/10
